

No computer  
should go to waste.

## FREE computer recycling event.

Dell is supporting the Environmental Protection Agency's "Plug-In to eCycling" campaign by organizing a FREE computer recycling event with Temple University. Bring your unwanted computer equipment to the drop-off location at Temple University's visitor parking lot on Saturday, June 14, and we'll donate it to a local charity or recycle it free of charge.

Accepted items include any brand of computer-related equipment – computers, computer monitors, keyboards, mice, printers and other peripherals. We will NOT be accepting televisions, copiers, cell phones or other household electronics unrelated to your computer, so please leave them at home. Please remove all data from your computer's hard drive and any removable media such as floppy disks or PC cards.

**June 14, 2003**  
**10 a.m. – 4 p.m.**  
**Temple University parking lot 3**  
**1601 N. Broad Street**  
**2 miles north of I-676**

## Working together for responsible solutions

While computers are safe to use, they do contain some environmentally sensitive materials. These materials can be safely removed or recycled, but only if we all work to keep these products out of our landfills in the first place.

Dell is committed to responsible solutions for reusing and recycling unwanted computers. Please join us in thanking our local partners for their generous support in hosting this event.

If you cannot join us on June 14, please visit Dell's new online computer recycling and donating option at [www.dell4me.com/recycling](http://www.dell4me.com/recycling). Dell|Recycling is designed to satisfy EPA requirements, and we take pride in giving consumers choices that are responsible, affordable and easy.

No computer should go to waste. **DELL™**
